

## Exercise: 1

### User Login

Username:

Password:

Remember Me: ☐

You must supply a username and password.

Create a page named ***login.php***. If user provides correct username and password and does not select remember me option then set cookie for 1 min and if selects remember me option then set cookie for 2 mins. During this time frame if user again provides correct username and password then displays message “You are already logged in...” and if incorrect username and/ or password then displays message “Username/Password Invalid”

### User Login

Username:

Password:

Remember Me: ☐

OK, so now cookie is set for a minute...

### User Login

Username:

Password:

Remember Me: ☐

You are already logged in...

### User Login

Username:

Password:

Remember Me: ☒

OK, so now cookie is set for 2 min...

### User Login

Username:

Password:

Remember Me: ☐

Username/Password Invalid

## Exercise: 2

Username:	<input type="text"/>
Password:	<input type="password"/>
<input type="button" value="Submit Query"/>	<input type="button" value="Reset"/>
<a href="#">Newuser</a>	

Fig 1
