Exercise: 1

User Login

Username: [_____]
Password: [_____]
Remember Me: ☐
[Login!]

You must supply a username and password.

Create a page named *login.php*. If user provides correct username and password and does not select remember me option then set cookie for 1 min and if selects remember me option then set cookie for 2 mins. During this time frame if user again provides correct username and password then displays message "You are already logged in…" and if incorrect username and/ or password then displays message "Username/Password Invalid"

User Login

Username: user1
Password: ●●●●|
Remember Me: ☐
[Login!]

OK, so now cookie is set for a minute...

User Login

Username: user1
Password: ●●●●
Remember Me: ☑
[Login!]

OK, so now cookie is set for 2 min...

User Login

Username: [_____]
Password: [_____]
Remember Me: ☐
[Login!]

You are already logged in...

User Login

Username: [_____]
Password: [_____]
Remember Me: ☐
[Login!]

Username/Password Invalid

Exercise: 2
